

March 5, 1984

LB 825

SPEAKER NICHOL: Excuse me. Just a minute, Senator Goll. Senator Newell. Senator Newell, you are being asked a question and before you are asked the question I want your attention please. Thanks.

SENATOR GOLL: Senator Newell, my question was with the several hundred thousand cars in Douglas County, how would you intend to monitor this situation by updating the odometer reading on every car that is licensed in Douglas County?

SENATOR NEWELL: Senator Goll, I wouldn't think that it would be that difficult a process. What you do every year when you register your automobile which happens to be a yearly occurrence based on the month, not all in one month, but depending upon when it comes, you write down...you walk into the county assessor's office, I mean the county treasurer's office, and you fill out a form that is typed onto your registration that says how many miles are on the car.

SENATOR GOLL: Who monitors those odometer listings?

SENATOR NEWELL: Senator Goll, this doesn't become applicable until you sell your car. You keep the mileage on there and if any year you haven't driven more miles than you did the year before or in any year that you actually had a net loss in the number of miles you could guess fairly reasonably that there is some game being played.

SENATOR GOLL: Thank you, Senator Newell. Thank you.

SPEAKER NICHOL: Senator Higgins.

SENATOR HIGGINS: Thank you, Mr. President. Senator Newell, I would like to ask you a question. I am not following this very well. First of all, your amendment says you will write down the mileage when you license your car each year, is that correct?

SENATOR NEWELL: That is not my amendment. I am trying to keep this section that they are trying to strike in the bill
